Formaldehyde and Glutaraldehyde Vapor Monitor

This Monitor can be used to measure personal exposure or room concentrations of both Formaldehyde and Glutaraldehyde. The monitoring badge will be accepted as accurate in any inspection or dispute because it is validated for accuracy and analyzed in an American Industrial Hygiene Association (AIHA) accredited laboratory. Each employee who uses formaldehyde as a regular part of their job must have their exposure monitored periodically, according to OSHA regulations. This Monitor meets OSHA accuracy requirements for both full shift and short-term measurements.

Anesthetic Vapor Monitor

Provides simultaneous measurement of waste anesthetic gases including Sevoflurane, Isoflurane, Enflurane, Halothane, Desflurane and Methoxyflurane. The Anesthetic Vapor Monitor can be worn as a badge or placed in the breathing zone as an area monitor. Occupational safety standards are based on personal exposure monitoring of each employee who may be exposed to the vapor as a regular part of their job. Periodic monitoring of personal and room concentrations is recommended.

X-RAY MONITORING BADGE

An affordable investment in workplace safety

Experts agree that there is no safe level of radiation. Even the smallest dose may cause cancer and genetic damage. Animal health facilities may be exposing staff to unsafe levels of radiation. That's why accurately measuring and recording radiation exposure over the long term is important for your employees and your practice. The Landauer Luxel Plus with state-of-the-art Optimally Stimulated Luminescence (OSL) technology, has the highest sensitivity available today—10 times the sensitivity of other technologies!

Features include:

- Fastest reporting in the industry
- A lifetime exposure record is archived for safekeeping
- Protects pregnant workers
- Personalized badges
- Web-based reporting
- Automatic renewal program
