X-RAY MONITORING BADGE

An affordable investment in workplace safety

Experts agree that there is no safe level of radiation. Even the smallest dose may cause cancer and genetic damage. Any healthcare facility may be exposing staff to unsafe levels of radiation. That's why accurately measuring and recording radiation exposure over the long term is important for your employees and your practice. The Landauer Luxel Plus with state-of-the-art Optimally Stimulated Luminescence (OSL) technology, has the highest sensitivity available today—10 times the sensitivity of other technologies!

Features include:

- Fastest reporting in the industry
- A lifetime exposure record is archived for safekeeping
- Protects pregnant workers
- Personalized badges
- Web-based reporting
- Automatic renewal program
